

Soft Gorillas is a modern Polish software house

„We are passionate about technology. We support our clients and educate at every stage of cooperation”

Bartosz S/ Web Developer

SKILLS

I am an experienced React.js developer with proficiency in HTML, MySQL, JavaScript, React, Python, Next.js, and C#. I possess an in-depth knowledge of front-end technologies, such as HTML and JavaScript, complemented by expertise in React.js, allowing me to design and create responsive, interactive web applications. My ability to handle databases like MySQL enables effective data management within applications. Additionally, my skills in Python and C# allow for a flexible approach to diverse programming tasks and projects. Familiarity with Next.js assists in creating optimized and efficient web applications. I am motivated to continually enhance my skills to adapt to the rapidly changing technological landscap

WORK EXPERIENCE

Soft Gorillas Sp. z o.o. Rzeszów, freelancing

01.2023 - currently

- Advanced proficiency in HTML, MySQL, JavaScript, React, Python, Next.js, and C#
- Developing responsive web applications using React.js
- Designing and managing databases, including MySQL
- Utilizing Next.js to optimize web applications
- Continuous skill enhancement in a dynamic programming environment
- I am ready to apply my experience and skills to innovate within the realm of React.js, while continuously evolving in this dynamic programming environment.

EDUCATION

Bydgoszcz University of Science and Technology, Bydgoszcz

- Information Technology - 10.2021 - currently

Relevant Coursework:

- Data Structures and Algorithms
- Web Development with React.js
- Database Management with MySQL
- Object-Oriented Programming using C#
- Python for Software Development
- Advanced JavaScript
- Server-Side Development with Next.js
- Software Engineering Principles
- Human-Computer Interaction

Capstone Project:

Title: Interactive Web Application Development using React.js

Description: Developed an interactive web application using React.js, incorporating various technologies such as HTML, JavaScript, and MySQL for effective data management. Explored user-centric design principles for a seamless user experience.

This educational background provided me with a strong foundation in computer science principles, specialized training in React.js development, and a diverse skill set essential for software engineering roles.
