

Soft Gorillas is a modern Polish software house

„We are passionate about technology. We support our clients and educate at every stage of cooperation”

About Chief Technology Officer:

Michał Czechowski: From an early age I am passionate about new technologies. I have been learning programming since the period of primary education. My specialty is PHP framework laravel and Symfony. The greatest satisfaction comes from solving clients' business problems, which makes me also improve my skills. During the consultation with the client, I notice the issues and adjust appropriate solutions. I am passionate about playing chess.

Michał Cz/ PHP Developer
